Tallahassee, FL 32399

RE: Docket No. 150230-WU; Application of Sanlando Utilities Corporation for Amendment of Water Certificate No. 247-W in Seminole County  
Our File No: 30057.225

Dear Ms. Stauffer:

The following are the responses of Sanlando Utilities Corporation (Sanlando or Utility) to the Staff's Deficiency Letter dated November 23, 2015:

1. Rule 25-30.020(2)(h)(6), Florida Administrative Code (F.A.C.), requires upon filing an application for approval of charges or conditions for service availability filed pursuant to Section 367.101, Florida Statutes (F.S.), the amount of the fee shall be \$2,250. Staff understands a filing fee of \$200 was paid for the application to amend the water service territory but not for the approval of new service availability charges.

**Response:** Rule 25-30.020(2)(h)(6), F.A.C. applies only if Rule 25-30.565, F.A.C. applies, and as discussed below, Rule 25-30.020(2)(h)(6), F.A.C. does not apply to the interconnect cost which Sanlando seeks to pass on to the customers requesting service.

2. Rule 25-30.030(6), F.A.C., requires the Utility to provide a copy of the Notice to each customer of the system to be certificated, transferred, acquired, or deleted. The affidavit provide by the Sanlando concerning the Notice, states that only the new customers in the proposed amended territory were provided the Notice, not all the customers. Please provide all the customers of Sanlando a Notice of amendment, provide an affidavit and a copy of the Notice to the Commission.

**Response:** Although the Utility is aware that the revised Rules which the Commission has recently proposed requires notice to the existing customers in addition to the customers of the system to be acquired, the existing Rule is unambiguous in only requiring notice to be mailed to the customers in the system to be acquired. Everyone else gets notice by publication. In none of the certificate extensions done by the attorney for Sanlando has the Commission ever required notice of a territory amendment be mailed to existing customers. See specifically the amendments for North Fort Myers Utility, Inc. in the early 1990's, and prior service area amendments by Sanlando and Sanlando's affiliated companies. To incur the expense to mail notices to over 10,000 existing Sanlando

customers when the Utility is proposing to add no more than 116 customers in Myrtle Lake Hills serves no useful purpose and would require Sanlando to incur significant and unnecessary postage and mailing costs that are not recoverable.

3. Rule 25-30.565, F.A.C., requires specific information to be filed when an application for approval of new or revised service availability policy or charges is requested. Please provide all of the required information.

**Response:** The instant application is not seeking the establishment of service availability charges as that term is used in Rule 25-30.565, F.A.C., but merely the cost recovery of providing service to a limited number of customers for whom the improvements are being constructed. Almost none of the documentation required by Rule 25-30.565, F.A.C. applies to this situation. The cost recovery of this extension, including the cost of the PSC proceeding, will be borne by the 111 or so customers to be served, and the remaining over 10,000 existing customers are not to be affected. The Commission is not being asked to develop a service availability charge applicable throughout the system, which is the purpose of this Rule. This proceeding is akin to that considered by the Commission culminating in Order No. PSC-92-1357-FOF-SU, wherein the Commission approved the prorated allocation of the cost of an interconnection without requiring a full service availability filing. See also, Order No. PSC-93-0971-FOF-SU.

We have additional questions concerning the need for service. Rule 25-30.030(6), F.A.C., requires that the Utility submit numbers and dates of permits for the revised system. The application noted that no permits have been issued. When will the permits be issued?

**Response:** Unless and until the PSC approves the petition, and the cost recovery of the capital costs, there is no need for the Utility to incur the expense of applying for the construction permit. If and when the PSC approves the petition, Sanlando will immediately initiate the process of developing a set of project plans and making application with FDEP for a water main extension permit.

The application also states, "There is a need for service in the Amendment Area because of failing water quality in the individual wells."

1. Please elaborate on the "failing water quality in the individual wells."

**Response:** The reference to "failing water quality in the individual wells" reflects the requests for water service by a number of Myrtle Lake Hills homeowners as described in Dockets 080644-WS and 040384. In Docket 080644, two Myrtle Lake Hills homeowners requested water service from Sanlando due to the failure of their private wells in a quick take amendment application. In that docket, the individual homeowners were faced with insufficient output from their wells, were not able to drill another well elsewhere on their property, and were very dissatisfied with the water quality generated from their wells when their wells were producing water. In Docket 040384, eight other Myrtle Lake Hills homeowners were added to Sanlando's service area with the four homeowners located on Ridge Road and Highlands Drive requesting service for the same reasons as those noted in Docket 080644. In addition, the homeowners located at 1091 Ridge Road (Hobkirk) and 1617 Overlook Road (Freeman) personally expressed to the Utility their current reliance on bottled water for much of their household needs due to their wells not producing enough water volume and pressure and the water quality being inferior. Freeman and Hobkirk personally contacted the majority of their neighbors in

Myrtle Lake Hills subdivision to gather support in advance of the petition for water service submitted to Seminole County in 2014. At that time, over half of the residents supported construction of a central water system with many expressing an immediate need for a new water source. In total, this indicates an ongoing and widespread dissatisfaction by many Myrtle Lake Hills homeowners with the performance of their private wells.

2. Does the Utility have examples of the chemical analysis of these wells? If so, please provide a copy of the analysis.

**Response:** Sanlando does not possess any water quality analyses of private wells in Myrtle Lake Hills. The utility instead has relied on the anecdotal information provided by the homeowners requesting service, either by survey response or as expressed during a question and answer session held in April 2015 that was attended by more than 50 residents of the neighborhood, to describe the inferior water quality experienced by them.

3. How many customer requests did the Utility receive? Please provide copies of the request for service.

**Response:** Attached please find the requested survey responses. A total of 59 responses indicated support for the construction of a central water system throughout the Myrtle Lake Hills community and specifically wanted to become a Sanlando customer. This indicates that a majority of the homeowners want water service right away and the sooner the better. Another 31 responses indicated support for the construction of the central water system but did not wish to become a customer initially. This indicates there is potential for those homeowners to request service at a future time. Some of this group recently invested in whole-house water treatment units that have proved satisfactory and thus have no immediate need for utility service, but they do expect to need water service in the future. Out of 99 total responses, only nine indicated no interest in becoming a customer of the utility (9% of the respondents, 7.8% of the cohort of possible customers). Over 89% of the homeowners chose to respond to the survey, which is a remarkable participation rate and indicative of very strong support for the petition.

Should you or Staff have any questions regarding this filing, please do not hesitate to give me a call.

Very truly yours,

MARTIN S. FRIEDMAN

1720 HIGHLAND DR

Thank you for the information. In theory, I support this effort and would be interested in establishing service subject to acceptable cost and time frame estimates being finalized for consideration.

Dave

Lindy Freeman ---06/02/2015 12:39:52 PM---Dear Mr. Gillespie, I hope you are not annoyed, as I am not even sure I have the correct David Gill

From: Lindy Freeman <lindyf@msn.com>  
To: "david.gillespie@myfloridalegal.com" <david.gillespie@myfloridalegal.com>  
Date: 06/02/2015 12:39 PM  
Subject: URGENT- cheaper piping deal for MLH

Dear Mr. Gillespie,

I hope you are not annoyed, as I am not even sure I have the correct David Gillespie. We are not at all certain you received this offer from Sanlando Utilities, Inc. It took me one year to convince the company to do it & although the extended deadline was yesterday, I believe you can still respond. Option one means you would come up with the money in 5 months or so and be in the first group. Option 2 means you think you would go for it later, at an increased price. Option 3 is self-explanatory. How you vote is not my business and your contact should be directly with the company (unless you decide to call me at 407 575 7712). Out of the 98 votes (of 111) so far received, we have only 9 "no" votes, so if yours is a no it will not hurt our cause one bit.

Sincerely, Lindy Freeman
