FPL increases should not be higher than the rate of inflation. And FPL should not be allowed to collect a charge for an imaginary future nuclear plant which will never be built. FPL should instead invest in renewable energy.

Hi Rick,

I believe that you are doing a great job Governing our State.

Glad you showed up in Orlando and let Obama know that you are concerned about our welfare and made that personal appearance to show him that you are a genuinely compassionate leader.

Rick Please look closely at this FPL Bill increase.

Those guys make soo much money, every month, from ALL of the Florida residents, and I don't believe that they are allocating the correct percentage of those profits by reinvesting and maintaining the infrastructure of their distribution system, cable plant and technology.

I was out of service, post Wilma for over 21 days.

I am not impressed with the FPL

service in my single family house, and I rarely complain about anything.

I live in Cooper City Florida.

I am a US Army Infantry Veteran.

And I love our Great State.

Thank you Rick,

God Bless you Sir.

We are known as the sunshine state, so we need to be that "shinning" example, we need government subsidies to help pay for solar on our homes, we do not need another rate hike so called investment to pay for a power plant that we do not need, solar would take the strain off the electric grid thereby making another rate increase unnecessary. We need to move away from fossil fueled power, its dirty and is like a cancer on Mother Earth, Wake up Rick Scott, also why would any business want to come to FI. Sure you could save money because of our minimum pay is so low, but corporations would be paying more in electric.

FPLs rates are already way too high. They are the only electric company in my area. They have a monopoly on this area and I should have the right to choose who I want to provide my power. FPL owns acre upon acre of wind turbines in Iowa. They are making money hand-over-fist in more ways than one. We have a high index of poverty in Florida. You killed the health care among other things. We have some of the lowest wages in the United States here in Florida. And in case you aren't aware since 1978 let's just say the late seventies, the average wage has only gone up 10%. In that same time frame minimum wage has dropped 5.5%. But amazingly those that are CEOs of these giant mega-corporations wages for them has gone up over 900%. College costs have gone up over a thousand percent. Housing and food cost of when up between 250 and 380%. We can't afford for FP&L to raise their rates. They're making money getting great big bonuses and paying the little people on the bottom next to nothing. Take it out of the CEOs paycheck and those that are getting bonuses right and left for doing a bad job if they have to raise their rates.
