We have no option of investing in any other power company, we have no say in how many millions of dollars they pay their C-Suite executives, and we have no accurate accounting for the full scale of political contributions they make each year to influence those in powers to keep FPL in its unchallenged, powerful position in this state.

They're asking for money to get more profit for their shareholders that are out of state as well as in state. We have seniors that cannot afford to buy their medication, and now with this rate increase, it's not only a 23 percent, those on a fixed income may have to not eat or forego medications to be able to pay their bills. This increase is totally unnecessary. FPL ads on TV brag about "reducing" rates and being cheaper than any other. We don't have a choice of any other service provider.
