Subject: docket number 160021-E1

Please consider the citizen who is on a limited income who's powerless against a company that has a "monopoly" on the services that are being provide; a necessary, not a luxury! We have no other choice but to deal with FPL and be subjected to any increases they deem necessary. Many seniors already have to choose between affording medicine and food. Now it will be even more difficult with a huge increase for a service we must have!
