COMMISSION
CLERK

Dear Ms. Stauffer:

It is quite incredulous, that FPL is requesting a rate hike of 23%, the purpose of which is profits for corporate persons and shareholders, in an economy where incomes have not at all improved half that percentage for both retirees and job holders. How can anyone justify this kind of callous profit taking on the backs of mainly those who will be hard pressed to meet the resulting cost of an essential service?

Greed is an inherent part of humankind, but unfettered greed such as this, which will impact so many that will find it a financial burden that impacts their ability to afford other necessities, is disgraceful and hopefully our officials will show their concerns for our citizens' welfare, by rejecting this callous request by FPL.

Sincerely
