Subject: FPL's proposed rate increase, docket number 160021-E1

We were unable to attend the hearings that were held regarding Florida Power & Light's proposed rate increase, **docket number 160021-E1**. We understand it is quite a significant request, and is not targeted to be invested to not our service, in the way one may hope such a rate increase would be spent.

Please consider those of us on fixed incomes, whose cost of living is minimal or zero, as we are being asked to pay substantially more for our electrical power. Any base rate increase should be comparable to what increases we receive, which was zero this year. The requested 23 percent (????!!!!) by FPL is certainly not appropriate. How can that be justified?

Thank you in advance, for your consideration in making this matter fair.
