RE: Docket # 160065
FROM: P.I.E (Palm Island Estates Homeowners Group)

Ms. Edgar,

Recently we have been informed of a proposal for a major increase in our residential water rates from Bocilla Utilities Inc.

Bocilla Utilities Inc. has a different business model than a year ago.

We submit to the Commission some facts that may be helpful as you make the decisions that affect the residents of our islands.

Bocilla Utilities Inc. no longer produces water for the islands. The R/O plant is shut down.

Bocilla Utilities Inc. is currently purchasing water from the Englewood Utilities at bulk prices.

The current water rates are based upon the old production and distribution costs of water.

Recently we have incurred small increases under the 1% levels. Purchasing bulk water eliminates numerous production costs RE: chemicals, electrical utilities, personnel, and day-to-day operational expenses.

Bocilla Utilities Inc. is a different corporation than a year ago. It is no longer a production facility but appears to be a distribution business. It does not appear to be fair or in the best interest for the public to be charged an increase on top of an old business model. It is on this premise that we ask that you look into the proposed rate request and evaluate accordingly with the above information.

Respectfully submitted by,
The P.I.E. Board of Directors
