Subject: Objection to Bifurcate and the Temporary Rule Waiver - Environmental Utilities LLC Docket 20200226-WS

Please count this email as an objection to the above waiver submitted by Environmental Utilities. If the norm for permitting is to submit with rates, connection fees, removal of current septic systems then Environmental Utilities should be made to include those costs (if they are experienced in sewer installation, they would include the costs).

All the costs should be known up front and a vote by the homeowners on Palm Island should be taken before any digging and damage to the turtles and landscaping on the Island. Since the inception of the development of the Island we have had septic service and have been pleased with its operation (if it's not broke don't mess with it) and its nominal cost - we are not interested in an additional monthly expense for sewer services.

Thank you

Fred Brown
