Thank you for responding. Just a side note: As I indicated earlier this is Vacation home that I get to visit just a few times a year. This is the same group that got a mandatory water system hook up passed which meant I had to pay to have a meter installed and then to have it hooked up to the house at quiet a cost. Now I'm required to pay maintenance fee whether I use a drop of water or not. We have had our water tested every year and it tested safe each time. So now I have to pay over \$900.00 a year whether or not I get to go the island or not. Just seems wrong.

Thanks for letting m vent,
Charles Norton

Subject: Environmental Utilities Docket # 20200226-SU

To Whom it may concern,

I am a vacation home owner on Little Gasparilla Island, LGI, which is a barrier island with no access to the main land except by boat. It has no paved roads only got cart paths. I am writing this e-mail in objection to EU's request for the bifurcation of the certificate and rate-making proceedings. I also **object** to the temporary wavier of Rule 25-30.033 (1) (p). and (q). With the inadequate information given concerning the applicant's financial strength and management experience as well as the expense to the homeowners involved with project, the applications request for such **should** be denied. As a stakeholder in the proposed service area, it is of the utmost importance to have **All** the relevant information regarding the proposed central sewer, including the proposed rates, connection fees and the type of system intended for installation. I, therefore request that the EU's request for bifurcation and wavier be denied.

Charles Norton
Homeowner on LGI
