Dear Sir/Madam:

This note is to plead that the proposed certificate sought by Environmental Utilities, LLC not be granted. I have grave concerns regarding their capacity to build the project; have they ever done a project of this magnitude before? I am concerned about their financial stability; I have seen the accounting from their water system and it appears that they are highly leveraged in that endeavor. I have issues with their ability to get the money to finance the project; do they have verifiable funds arranged or do they expect the County to assist them? The management of the enterprise also gives me heartburn; in dealing with the water utility I have had difficulty contacting any office personnel; it appears that they work one morning a week. This is a big project and having a third-party for-profit enterprise injected into the

equation makes no sense. The County needs to set aside the time, manpower and money and do this properly. There are reasons for government and this is certainly one of them. Again, deny this certificate for the above reasons and more.
