That would probably be a fair assumption, that's about 7 a year which should be reasonable.

Subject: FW: LFDA ELP - Forest Lake Estates

Ryan,

Can you tell me what the projected timeline is to complete construction of the water and sewer infrastructure associated with the Forest Lake Estates 35-lot development currently under way?

Would it be accurate to say that within five years you expect to have improved all 35 lots and connected to the water and sewer services? I am asking this in the context of a question posed by PSC staff in our current rate case.

Please respond no later than Tuesday.

Thanks,
Patrick
