May 8, 2020

Per your request we are providing a proposal for the lining of 3 sanitary sewer manholes. Option one is to coat the existing manholes using Strongseal protective coating system and repair minor leaks. Option two is to remove the existing top cone and insert an FRP liner into the manhole and install a new ring & cover. Both options include restoration and clean-up at each site. Quoted costs are valid for 45days.

Option one proposal:

- SSMH in MHP - \$9,450.00
- SSMH Winchester & Curlew - \$7,640.00
- SSMH 3107 Winchester - \$8,650.00

Option two proposal:

- SSMH in MHP - \$19,810.00
- SSMH Winchester & Curlew- \$18,600.00
- SSMH 3107 Winchester - \$19,720.00

All proposal pricing is based on uninhibited access to each manhole. It is up to Utilities, Inc. to obtain a right-of-way, written permission and/or easements as required to perform the work.

If any major leaks are encountered, they can be repaired for an additional charge. Pricing for leak repair is \$330.00 per manhole plus an additional \$330.00 for each gallon of repair material used.

If you have any questions, please feel free to contact us. We look forward to working with you on this project.

Thank you,

Russ DesErnia - Estimator
