RE: Docket: 20200226-SU

Dear Clerk,

I own the property at 95 Spyglass Alley, Placida (Cape Haze), Florida 33946. I am writing to oppose the application currently before the commission filed by Environmental Utilities to install a sewer system to serve Cape Haze and the nearby barrier islands. I strongly feel the sewer system is unnecessary as the Cape Haze community has a low population density and there is no evidence the current septic systems are a source of pollution to the area. In addition, if sewers are deemed necessary or desirable the company selected to provide the system should provide evidence of a strong financial position and operational experience in order to complete the project and maintain the system for years to come. It is my understanding that the applicant is inexperienced and not well capitalized. The applicant is also unable to inform the affected property owners how much the upfront cost will be nor the projected rates for service in the future. The applicant has also not offered a provision for installment payments for the affected properties and thus would place a large financial burden on the affected property owners to make a lump sum payment.

Thank you in advance for the consideration of my opinion. Please let me know if you have any questions or require further information.

Yours truly,

Brooke C Farr
