- 15 Notes:
- 16 (1) Increase in plant in service is primarily due to the Crist CTs and two solar sites being placed into service at the end of 2021 and the North Florida Resiliency Connection being placed into service mid-2022
- 18 (2) Decrease in construction work in progress is primarily due to the Crist CTs and two solar sites being placed into service at the end of 2021 and the North Florida Resiliency Connection being placed into service mid-2022
- 20 (3) Decrease in cash is due to drawdown in Bay County Industrial Development Authority Revenue Bond for sewage and waste water disposal construction projects at Plant Smith
- 21 (4) Decrease in uncollectible accounts receivable is due to a reduction in expected bad debt expense associated with the COVID pandemic
- (2 (5) Decrease in accounts receivable from associated companies is due to receipt of payment in 2021 from Palms Insurance Company for Hurricane Sally claim
- 23 ⁽⁶⁾Decrease in other regulatory assets is primarily due to recovery of storm costs through surcharge for Hurricane Michael in 2022
- 24 (7) Increase in miscellaneous deferred debits is primarily due to prepayment of long-term service agreement and an increase in pension and post retirement assets
- 25 (8) Increase in taxes accrued is primarily due to increase in property taxes as result of increase in plant in service
- 6 (9) Decrease in miscellaneous current and accrued liabilities is primarily due to payments of Hurricane Sally storm costs in 2021
- 27 (10) In preparing this MFR, it was discovered that the ARO Regulatory Asset was incorrectly classified as a Regulatory Liability, but as this is removed from retail rate base, it will have no impact on the proposed base rate increase
- 29 Decrease in other regulatory liabilities is primarily due to reduced ARO depreciation related to the retirement of Plant Scherer ARO in 2022 as well as reversal of ECRC over-recovery from 2021
