Subject: Stop Rubber Stamping FPL Requests!

Dear Commissioner

Florida Power & Light is asking for the largest single rate hike in Florida history at a time when consumers are facing an increased cost of goods and services as we recover from the economic downturn caused by COVID-19. Increasing the cost of electricity is something you, the Public Service Commission, can control.

It is unconscionable to think that we should have to pay more for our electric service at a time like this. Rubber stamping an all-time high return on equity of 11.5 percent goes against helping struggling Floridians. Putting people over profits should come first.

Now is not the time to give FPL what it wants; let's keep the public in Public Service Commission!

I am a recently divorced senior. I will be making less than \$1,500 per month next year when I file for SS and am currently unemployed. There is NO reason that an electric company that makes millions of dollars per year should be allowed to raise electric rates. Especially as they

continue to rave about their low rates in Florida. CURB your expenses like I have had to do. I already keep my thermostat at 79 to conserve electricity. I can't go any higher.

Thank you,

Anne Mcdonald
