Subject: Reject FPL's harmful and shortsighted rate hikes

Dear Commissioner Gary Clark,

As an FPL customer, I urge you to reject the company's proposed rate increases.

Florida families are still recovering from the economic hardship caused by the COVID-19 pandemic. Meanwhile, FPL disconnected more than 550,000 homes from power due to late payment since the fall, even as it increased its own profits by 10% last year.

It is not in my best interest to be paying for fossil fuel plants that FPL wants to run for the next fifty years - when FPL should be committing to a rapid transition to a 100% clean energy system.

It will not serve the public to charge us over \$10 billion for purported grid "investments" (over \$900 per customer!) that will only deliver a couple of minutes of improved reliability every year.

FPL's plan ignores the most cost effective resource - energy efficiency - at every step of its plan, instead choosing to expose us to even more risks due to rising energy costs.

FPL doesn't propose a single new program or protection for its most vulnerable customers, in contrast to other utilities that are implementing new disconnection safeguards, efficiency offerings and programs to help customers access clean energy to lower bills and become more energy resilient.

Please reject FPL's new proposed gas plants, require the Company to give real consideration to energy efficiency programs in all of its planning decisions, and move Florida toward a more equitable and resilient energy grid.

When considering FPL's proposal, I urge you to prioritize the needs of Floridians — particularly our most vulnerable communities — and reject these needless rate increases.

Sincerely,
Laurie Crooks

Dear Commissioner Gary Clark,

As an FPL customer, I urge you to reject the company's proposed rate increases.

A requirement for tying the utility electric grid to battery storage systems at home that the utility will rely upon can help solve the need for electric power when the utility needs it instead of building at great expense new energy plants.

Florida families are still recovering from the economic hardship caused by the COVID-19 pandemic. Meanwhile, FPL disconnected more than 550,000 homes from power due to late payment since the fall, even as it increased its own profits by 10% last year.

Dear Commissioner Gary Clark,

As an FPL customer, and participant with the utility in its net metering, I urge you to reject the company's proposed rate increases. As residents in what has been proudly called the Sunshine State, it is well past time for our utilities to take our renewable resource into account in their planning for future needs.

Florida families are still recovering from the economic hardship caused by the COVID-19 pandemic. Meanwhile, FPL disconnected more than 550,000 homes from power due to late payment since the fall, even as it increased its own profits by 10% last year.

This continued reliance on fossil fuels such as fracked natural gas makes no sense at all, especially with the utility's growing investment in community solar. Fossil fuel prices will be undercut by renewables in ten years or less; the related plants will be mothballed soon and we will be stuck with their ongoing financing. FPL should be committing full-bore to a 100% clean energy system.

Please reject FPL's new proposed gas plants, require the Company to give real consideration to energy efficiency programs in all of its planning decisions, and move Florida toward a more equitable and resilient energy grid.

When considering FLP's proposal, I urge you to prioritize the needs of Floridians — particularly our most vulnerable communities — and reject these needless rate increases.

FPL doesn't propose a single new program or protection for its most vulnerable customers, in contrast to other utilities that are implementing new disconnection safeguards, efficiency offerings and programs to help customers access clean energy to lower bills and become more energy resilient.

Please reject FPL's new proposed gas plants, require the Company to give real consideration to energy efficiency programs in all of its planning decisions, and move Florida toward a more equitable and resilient energy grid.

When considering FPL's proposal, I urge you to prioritize the needs of Floridians — particularly our most vulnerable communities — and reject these needless rate increases.

Sincerely,
Monther Ismail

Subject: Reject FPL's harmful and shortsighted rate hikes

Dear Commissioner Gary Clark,

As an FPL customer, I urge you to reject the company's proposed rate increases.

Florida families are still recovering from the economic hardship caused by the COVID-19 pandemic. Meanwhile, FPL disconnected more than 550,000 homes from power due to late payment since the fall, even as it increased its own profits by 10% last year.

It is not in my best interest to be paying for fossil fuel plants that FPL wants to run for the next fifty years - when FPL should be committing to a rapid transition to a 100% clean energy system.

It will not serve the public to charge us over \$10 billion for purported grid "investments" (over \$900 per customer!) that will only deliver a couple of minutes of improved reliability every year.

FPL's plan ignores the most cost effective resource - energy efficiency - at every step of its plan, instead choosing to expose us to even more risks due to rising energy costs.

FPL doesn't propose a single new program or protection for its most vulnerable customers, in contrast to other utilities that are implementing new disconnection safeguards, efficiency offerings and programs to help customers access clean energy to lower bills and become more energy resilient.

Please reject FPL's new proposed gas plants, require the Company to give real consideration to energy efficiency programs in all of its planning decisions, and move Florida toward a more equitable and resilient energy grid.

When considering FPL's proposal, I urge you to prioritize the needs of Floridians — particularly our most vulnerable communities — and reject these needless rate increases.

Sincerely,
Victoria Olson
