Hello,

Attached are four of the pictures that I mentioned in my testimony given to the commission on 06/29/21. I was speaker 533 for your Docket #20210015-EI.

A representative for FPL told me not to worry about this leaning pole because it was not dangerous and there are many others like it and they are not a problem for FPL. In addition, another representative told me not to worry because the wires actually hold up the poles.

This pole is located behind my residence at 628 NW 3rd Avenue in Fort Lauderdale. Additional photos are available, both earlier views and those taken at the same time as the ones shown below. These were chosen because they more clearly show the lean of the pole.
