Dear Sir/Madam:

Re: Base Rate Increase

Pursuant to the proposal for the increment of rate, this is to provide personal comment.

It would definitely increase a burden to any household expenses in accordance with the proposed rate. It is not a modest increased especially the general inflation and the cost of labor remains indifference this decade.

It is very fortunate that not much impact like power surge from the hurricanes even with the exceptional downpour with the thunderstorm recently. The power was recovered within 20 minutes.

There was not much changes of the service except the total billing is increased every month in comparison with previous billing (total payment was shown less in the period between 2018 and 2019). Many enquiry was made due to the high bill previously. It was once again indicated to Tampa Electric in writing a year ago.

It is just to anticipate not much burden shift to the residents. Your consideration and review would be essential and appreciated.

Sincerely,

Janice Wilcox
