COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company
Details:

I have been a resident of Florida since 1951 and to my recollection, the PSC has never denied an increase in rates for FPL. Perhaps it should be renamed PDC (public disservice commission). I would recommend a thorough investigation into the commissions' members and their holdings of FPL investments. If FPL wants more revenue, maybe they should stop paying for advertising on television and other media justifying their spending and extolling their virtues. It's not as though I have a choice in electrical service providers. On another topic, I'm very upset with the way they send around their "tree butches" devastating trees by over cutting them to the point of rendering them unsightly and compromising their health. In my 130 home community alone they destroyed trees by over trimming to the extent that we had to pay thousands of dollars for their removal after FPL were finished with them. We experience frequent power interruptions, some of which have harmed computer and electronics. I frequently have to reset my clocks and reboot or recycle household electronics. Most of this happens on clear weather days. Oh yes, FPL will sell me insurance to cover problems that they create...really?

With the aforementioned, I very much against any rate increases
