Subject: Central Sewer System - Bayshore Circle 53/55 -Palm Island

I am writing in full support of the addition of a central sewer system and the elimination of septic tanks. As I am sure you are aware, septic tanks are very bad for the environment. These tanks allow nitrogen and other pollution to flow directly into our waterways. This pollution feeds algae blooms, kills fish, and kills sea grasses and is likely a contributing factor to red tide. Also, many of the old tanks are cracked or rusted and are leaking into our water supply and waterways. We can not afford not to install a central sewer system and eliminate the septic tanks. I am a property owner on Palm Island and DO NOT SUPPORT the local organization(PIE) that is against this proposal. Ignorance to real issues is not an excuse not to keep our waterways and water supply pristine. Please support this program and proceed with the system.

Thank You,
Gary Buhler
