Subject: Docket#20200226-SU

Good Afternoon:

We are formally requesting that the PSC deny the EU application for wastewater service:

The applicant has no technical expertise to undertake an environmentally sensitive project such as this on a barrier island with a large population of protected gopher tortoise. To dig up the island and install sewage pipes under the intercoastal is inviting a major environmental catastrophe.

To date the applicant has not shown that it has the financial ability to undertake this costly project and, further, does not seem to know the cost of the project itself nor the fees that would be forthcoming for the island property owners.

Most importantly, there is no evidence that a central sewage system is needed. The island is not even in the County 5 year plan. The density of the island is low – with single family dwellings at least half of which are unoccupied for six months of the year. Personally, our septic is inspected each year by Charlotte County and was, of course, installed by a county approved septic service.

We have lived in The Preserve of Don Pedro on Don Pedro Island for 17 years and are Florida residents...540 S. Gulf Blvd, The Preserve, Don Pedro. cherylbethklaus@hotmail.com; brunosiu63@gmail.com

Again, we strongly oppose this EU application for wastewater service.

Bruno and Cheryl Klaus
