Subject: Little Gasparilla Island (LGI)- Waste water plan

Dear Commissioners,

The proposed plan for a central waste water system on LGI is not feasible for the residents and there are many negative concerns including property rights, reliability, implementation, maintenance and cost, just to name a few issues. A better solution needs to be developed. If this waste water system and associated cost were to be proposed for your neighborhood and your property would you support it?

Please reject this plan and give us time to explore better options.

Thank you for your time and consideration.

Sincerely,

Alicia Argiz-Lyons
