Subject: Petition and Letters to PSC

Dear Office Holders,

Northwest Florida is reaching out to our elected officials that were voted in to represent our best interest. The residents of Northwest Florida deserve better than this! So many of us are hurting due to Florida Power and Light's arrival in our communities. We are reaching out to our elected officials to say enough is enough with this hostile takeover. We were all lead to believe that our bills would increase \$15. Now as bills are rolling in they are \$100, \$200, \$300 or more. Bills are doubling and tripling. We have many residents that are on fixed incomes such as retired military, elderly on social security, single parent households, and so many hard working families that struggle from month to month that cannot afford this. An increase of this proportion should never have been approved while families are grappling with the Covid pandemic and inflation! This is unacceptable and needs attention now!

One important issue is the discrepancies in kilowatt-hours. The majority of resident's kilowatt-hours run around the same base line give or take. That is until Florida Power and Light arrived in our communities. Now, resident's kilowatts-hours are skyrocketing. This is not a coincidence. After receiving extremely high bills many residents have resorted to monitoring their own meter. This has resulted in multiple people discovering that the meter on their house does not match Florida Power and Light's records. Why are some of us being charged a 33 day billing period? Could it be to push people over the 1,000 kilowatt threshold? In addition, several residents have also reported higher usage on weekends even when no one is home. Attached you will find examples of these bills.

Undoubtedly, the residents of Northwest Florida are being charged the most extreme rates in

the entire state. That second tier at more than .16 is obscene. Especially considering most electric utilities cost a little more than .11 per kilowatt-hour! We are being hammered with fees on top of the rate increase. Every customer's bill is showing a base rate of \$8.99. Some cities in Northwest Florida are even being charged a 6% franchise fee for a company we do not want. We are still being charged for hurricanes Sally and Michael. Florida Power and Light was not responsible for providing service to our area when these occurred. Why are we paying them? Have we not been paying Gulf Power? Was any government or Fema money issued after a state of emergency was declared? Why are we paying an energy conservation recovery charge for programs to reduce electric demand? That is not our responsibility. If it is the company's goal they should fork the money over from their massive profits. It should not be our responsibility to continually pay an environmental recovery cost either. What is a capacity payment recovery cost and why are we paying it? To add insult to injury, Florida Power and Light is also charging a late fee. Clearly the residents that receive this fee are already struggling to make ends meet. So they charge them more? Obviously this is a heartless company that does not care who they hurt. Northwest Florida residents deserve transparency. We deserve to know exactly what we are paying for. We deserve fair rates!

Sadly, when customers call Florida Power and Light, because they have an issue with their bill they are being put on hold for hours on end only to reach no one. One resident was left on hold 20 hours just to be forced to hang up. The families that this company is crushing cannot even reach anyone to discuss their bill. That is horrible customer service and a terrible business model. When people actually reach someone they are being told, "pay it anyway," even in times where there is clearly a problem. There is no reasoning with this company. People being affected by this are resorting to extreme measures such as flipping breakers off, not running heat when it's cold, unplugging items, and turning off their water heaters. Some of their bills are still high. We did not have to live like this with Gulf Power and we should not have to live like this with Florida Power and Light either. This company is stealing your constituent's livelihood. Far too many are having to choose between putting food on the table, buying medicine and paying their electric bill. So many are crying out for help. This is only the beginning. This situation could likely turn deadly in the summer months when residents are too afraid to turn on the air conditioner because of the cost!

Clearly, electricity is a basic human necessity. An electric company should not be a monopoly and be for profit. That is a recipe for disaster. It is very unfortunate that Florida Power and Light has front-loaded the absolute maximum rate onto the backs of Northwest Florida residents. Making us all unwilling investors to fund their pet project of creating the largest solar farm in the United States, which their parent company NextEra happens to be producing.

As a result, of many issues and discrepancies there needs to be an investigation into Florida Power and Light and its parent company NextEra. Why was such a drastic increase approved? Why are people seeing skyrocketing kilowatt-hours? Who has profited from this deal? Why are so many of our elected officials silent in the highest offices of the Florida government? Their silence is deafening. There needs to be a forensic audit conducted on this company from an outside source, not in our homes. We have the same routine we have had well before they arrived.

If Northwest Florida still chooses to do business with this monopoly, the terms of this agreement need to be renegotiated for a better more affordable rate for all of whom are being affected. At least the almost 17,500 people that signed the Change.Org petition and the nearly 10,000 members of the FP&L Price Gouging - Northwest Florida group agree. We are asking that you join in the letter with the cities of Crestview, Pensacola and Milton to the Public Service Commission. We must find a solution to resolve what has been allowed to transpire and ease the extreme burden being placed on

the residents of Northwest Florida. We want answers. We look forward to your response and hope you join us in finding a timely reasonable solution.

Sincerely,
Northwest Florida Residents

Re: Florida Power & Light Company, Northwest Service Territory Rates

Dear Sir or Madam:

We are writing to you today on behalf of the City of Pensacola, Florida and its citizens, concerning the rates charged by Florida Power & Light Company ("FPL") to the citizens of Northwest Florida. We request that the Florida Public Service Commission ("PSC") staff be directed to re-investigate FPL's rate increase filings for accuracy, review the current rates effective January 2022 to ensure they are fair and reasonable, review FPL application of those rates to customers' accounts and, if necessary, direct FPL to address inadequacies in fuel diversity and fuel supply reliability which have resulted in unconscionable fuel charges to FPL customers following the Rate Increase which was effective January 2022.

The citizens of Northwest Florida already pay some of the highest electric utility prices in all of Florida. With the increase in rates effective January 2022, Northwest Florida pays 29% more than those customers serviced by Tampa Electric Company and Florida Power & Light outside the Northwest Service Territory and 10% more than those customers serviced by Duke Energy of Florida and Florida Public Utilities Company.

**Florida Investor-Owned Electric Utilities
Total Cost for 1,000 Kilowatt Hours - Residential Service**

Utility Provider	Rates prior to January 2022	Rates as of January 2022
Florida Power & Light, Northwest Service Territory	148.78	155.61
Florida Power & Light	113.85	120.67
Duke Energy Florida, LLC	132.21	140.96
Tampa Electric Company	118.07	120.91
Florida Public Utilities Company	129.36	129.49

Already hit hard by the rate increases associated with the four-year rate settlement approved by PSC on October 26, 2021, as well as rises in gas, food and living cost, many of our citizens are finding it difficult to pay for the basic necessities; no less take on another FPL rate increase. The residents of Northwest Florida are furious with FPL, and rightfully so. Over the past few months, the City of Pensacola has experienced an increasing presence of Citizen attendance at City Hall meetings expressing their concerns and frustrations regarding their power bill. Many residents are reporting that their electric bill has doubled or tripled and are requesting the City of Pensacola take action before they have to choose between keeping their electricity on or putting food on the table. In addition to picketing City Hall, residents have started an online petition protesting the FPL rates. As of the date of this letter, the petition had 17,428 signatures. A copy of the petition has been included with this letter but with the signatures constantly rising, we would ask that you check the status of the petition to get recent numbers by visiting:

We are requesting that the PSC, as the entity with exclusive jurisdiction to set rates for investor-owned utilities, review the FPL rate structure to ensure rates are "fair and reasonable" as required by Section 366.05 (1) (a), Florida Statutes. Further, we request that the PSC require FPL to address inadequacies in fuel diversity and fuel supply reliability that at least in part resulted in increase to utility bills for FPL customers as required by Section 366.05 (8), Florida Statutes. Finally, we request the PSC, require an audit of FPL in order to ensure approved rates are being appropriately applied to customer accounts and electricity usage is appropriately billed. Our citizens, and every FPL customer, deserve another look by the PSC at this crippling situation affecting all those who reside in Northwest Florida.

Thank you in advance for your consideration.

Re: FPL

Dear Sir or Madam:

I write to you today on behalf of the City of Milton, Florida and its citizens, concerning your December 12, 2021, approval of dramatic rate increases (the "Rate Increase") by Florida Power & Light Company ("FPL"). In short, I request that PSC staff be directed to re-investigate FPL's rate increase filings for accuracy, review the current rates effective January 1, 2022 to ensure they are fair and reasonable, and, if necessary, direct FPL pursuant to the PSC's jurisdiction in Section 366.05 (8), Florida Statutes, to address inadequacies in fuel diversity and fuel supply reliability which have resulted in unconscionable fuel charges to FPL customers following the Rate Increase which was effective January 1, 2022.

First, we note that the PSC's own records reflect that FPL residential customers formerly served by Gulf Power pay the highest utility cost of any investor-owned utility in the State of Florida.

The PSC's December 12, 2021, approval of the Rate Increase contains the following excerpt:

The 2021 Settlement has a minimum four-year term through December 31, 2026. Base rates and service charges will be increased to generate an additional \$692 million of annual revenue effective January 1, 2022. Effective January 2, 2023, FPL's base rates and service charges will be increased to generate an additional \$560 million in annual revenue. FPL is authorized to expand its Solar Base Rate Adjustments to construct an additional 1,788 megawatts of solar projects in 2024 and 2025. FPL's regulatory return on common equity is set at 10.6% for all purposes with a range of 9.7% to 11.7%. [***] Finally, effective January 1, 2022, unified FPL rates will apply to all customers throughout the former FPL and Gulf service territories.

That passage reveals the following facts that the PSC determined, and allowed for the Rate Increase:

1. FPL will generate an additional \$692,000,00 in revenue in 2022 as a result of the Rate Increase;
2. FPL will generate an additional \$560,000,000 in revenue in 2022 as a result of the Rate Increase;
3. The total of the two above facts is that \$1,252,000,000 (\$1.2 BILLION) in additional revenue would be shouldered by rate-paying customers;
4. Despite record inflation leading to higher costs of goods, as well as a slumping economy from the effects of COVID, the PSC permitted FPL to keep a 10% profit margin, effectively removing any risk.

These are staggering numbers. Particularly so when, because of FPL's own business decisions, approximately 80% of its generating capacity utilizes a non-diverse fuel source (liquified natural gas) that is at historically record high prices. Other forms of fuel for generation remain viable and cost-efficient but were shunned by FPL. The result of FPL's poor strategic decisions about fuel types for generation clearly suggest that it lacks fuel diversity and supply reliability, which are matters expressly within the PSC's jurisdiction. And yet, the PSC allowed FPL to pass on to its customers record high costs.

It is fundamentally unfair for FPL customers formerly served by Gulf Power to suffer from the highest utility costs of any investor-owned utility in Florida. The customers – our citizens, friends and neighbors – had virtually no voice and no representation. What was promised as a modest “2.5%” increase has turned out to be a ten-fold underestimation by FPL and the PSC in what customers are billed.

I request that the PSC, as the entity with exclusive jurisdiction to set rates for investor-owned utilities, review the FPL rate structure to ensure rates are “fair and reasonable” as required by Section 366.05 (1) (a), Florida Statutes. Further, I request that the PSC require FPL to address inadequacies in fuel diversity and fuel supply reliability that at least in part resulted in exorbitant utility bills for FPL customers. Our residents, and every FPL customer, deserve another look by the PSC at this crippling situation created by FPL.

Thank you in advance for your consideration.

Sincerely,

Randy Jorgenson,
City Manager

With lower income families, such as my household, facing the hard end of a sharply increasing inflation, a spike of \$200 addition to our bill, we (and others in a similar situation) will struggle to keep the lights on. It will make our ability to even cook near impossible. With children in the house, buying proper food is already difficult. The fantasy the older generations push of "finding a better job" or "just go get a trade" are steadily becoming that of a memory and the gauging of electric bills are only adding to the decent of our economy.
