COMPLAINT INFORMATION

Complaint: Other Complaint against Florida Power & Light Company

Details:

Regarding the new minimum base billing that FPL just started imposing. This is going to wipe out the incentive for some people to install solar panels at their homes. From FPL's attack on net metering over the past months, it's clear that this is exactly what FPL intends to do. The problem is that the climate change issues are real, and the more people who install solar, the quicker we'll reduce our reliance on non-renewable sources of power. I think FPL is protecting their monopoly at the expense of the environment. It's sad to see that the PSC is willing to be a party to that. Please reconsider and do what's right for all life on our planet, not just FPL's shareholders. Thank you.
