Subject: Florida Power and Light

As a customer in the panhandle of Florida I am very disappointed in the allowing of FOL to purchase Gulf Power and be allowed to raise rates in the pan handle by double and sometimes triple our previous rates. Now they are wanting to be allowed to raise rates again for "modernization", this company is projected to make a \$1 billion dollar profit just off the panhandle of Florida Alone. How about as a commission you tell them to take their profits and make those changes and not in our power bills. Prior to FPL taking over our monthly power bill ran about \$200 a month. Now we sit at \$450-\$500 a month and nothing changed in usage. This should never be allowed to be done.

Please listen to us in the Panhandle and do not let them change rates yet again. We can not afford it. In my town the cost of home to median income is almost 7x the amount and coupled with this increase it's almost impossible for people to live here and fulfill the American Dream.
