Subject: Docket No. 20220001-EI: No new electric rate hikes!

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am a lifelong Floridian, mother of three, home owner, green schools advocate with the Florida PTA.

I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me and cash strapped schools. I am urging you to rethink this decision and not increase energy bills for homeowners and schools.

This past year has been extremely challenging financially for many people in the state of Florida. Teachers are not getting paid enough to stay in this state and school cannot possible absorb a 15% rate increase on the second biggest expense after teacher salaries.

A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time.

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year. In addition, we installed solar panels 3 years ago and just recently, FPL has assessed an increase in our connection fee by a factor of 300% (from approx \$8/month to around \$25/month). All this for people like us who are making every attempt to protect our planet.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am writing as a concerned Northwest Florida resident and FPL customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially especially for NW Florida since we have the highest of the high rates for electricity. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time. FPL has documented excessive profits for 2021 and 2022. Let them enjoy that profit instead of banking even more in 2023 on the backs of Florida residents who just can't do any more with the astounding inflation of this past year.

Note: This is unacceptable. They need to be regulated more aggressively to be lowering the cost of power in our state. We should be #1 in renewable energy but instead they blow their lobbying budgets on stricter regulation on home solar. Please for God's sake do your jobs and make them do their Jobs properly. Whether its by forcing them to pay more taxes to offset carbon emissions reallocating said taxes to incentive renewable energy companies coming to FL so the market isn't cornered. More competition in the "free market" is always a win for consumers. We're bending over to these clowns and taking the on all the worst parts of the business so they have another shitty quarter of record profits. This is absolutely going to destroy our economic performance when Florida should just be #1 in energy and entertainment. I've said my peace don't let other states have all the money.

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time.

Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.
