**Subject:** Utility prices

To whom it may concern. You allowed Gulf power and Florida power to raise their rates. From what I read this is a four year outlook. How do you expect people on fixed incomes who cannot work to be able to pay their utilities bill.

I live in Milton Fl. The pkw rate went from 12% to 16% . Not including all the other fees. That is a huge hit, and I've heard it's going up again in January 2023. I'm on social security. The inflation rate in Fl Is about 9%. I don't get a 9% pay hike.I guess I'm supposed to chose between being able to eat or having electricity. Supposedly after 4 years the the utility bill will be lower than it was in 2008. Well now, that's a laugh isn't it. Any one with a brain knows that is a lie. The solar scheme is bullshit. You have to pay forty grand for Solar, still pay an electric bill. Insurance companies won't give you a policy because of the solar panels. Now you have to pay double to insure your home. If you want to sell your home, it's harder to sell because of the panels. I know this because my friend is a realtor. They can't get insurance and sometimes financing on these homes. It would be nice if someone would actually tell the public the truth about this. Electric companies are actually telling people with solar that even if their bill is 0 they are going to change them \$25.00 plus fees. So your bill won't be 0. What a racket. When you put panels on your roof, it puts holes in your roof. Now your roof leaks. I will quit bitching now.

I know their are a lot of people out there that are suffering from this. Something needs to be done.

Thank you for your time

Marci Sheridan
