Docket No. 20220001-EI

To Whom It May Concern, I am a customer of Duke Energy Florida. I understand that the Florida Public Service Commission (FPSC) is considering a request by Duke Energy Florida to increase its rate for 2023 due to "volatile" fluctuations of natural gas prices. I understand costs are going up for everyone, and that includes businesses, the the percentage they are asking for is over inflated based on other Florida markets. Duke's electricity rate per KWH is currently 29% higher than FP&L (see below) and Duke is now asking for another 15% for 2023, the highest increase of the three monopoly power companies seeking a rate increase. Duke already charges more per KWH than the other two, large investor-owned electric utility companies in Florida (source: Sept. 2022 issue of Florida Trend Magazine): Duke Energy - \$201.32/1,500 KWH FP&L - \$156.81/1,500 KWH Tampa Electric – \$175.17/1,500 KWH Non-investor owned near me: OUC - \$169.25/1,500 KWH The FPSC Commissioners need to be asking, "How can Duke Energy justify asking for even more money from their captive customers when they already charge the highest rate compared to all the other major electricity utilities in Florida?" Rather, the Commissioners should tell this public monopoly utility to look harder for cost savings and new efficiencies, and reduce their profit margin rather than asking for even more money from their captive customers. I strongly urge the FPSC Commissioners to reject this rate increase request. Kristen Wolfe
