**Subject:** Docket No. 20220001-EI: Reject the new electric rate hikes!

Florida Public Service Commission Clerk,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to reject these proposals and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be

on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases at this time.

How many rate increases are you going to approve? When is enough enough? When will you stand up for your own mission of setting fair rates?.....

"I am on a fixed income and I have my air conditioner set on 78 degrees all the time. My bill the same time last year was \$103.13 and this year it was \$139.66. The kWh were 143 more than last year. I repeat I am on a fixed income and try to use as little electricity as possible but I do live in an electric home and my appliances and air conditioning are 3 years of age.... Please with all the other increases in food and gas and other utilities and increases in property taxes please do not increase this year..... We are eating less and I have lost 50 lbs since this inflation has begun. I am hungry..... Please refrain from these increases..... please.... I wish things were like they were before....but due to poor government decisions the people on fixed retirement incomes are the ones suffering the most. Please do not raise the rates.... not now....
