Subject: Docket No. 20220001-EI: No new electric rate hikes!

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time.

I installed solar panels, use NO ELECTRICITY from the grid and STILL PAY A BASE RATE OF \$25.00 plus taxes and fees to equal more than \$36.00 per month! I will soon retire and be on a fixed income - paying even more for something I do not even use is unconscionable. PLEASE, PLEASE do not raise our rates when FPL HAS HUGE PROFITS ALREADY!

PLEASE THINK OF PEOPLE ALREADY STRUGGLING FINANCIALLY WITH INFLATION AND ALREADY HIGH UTILITY PRICES which provide HUGE PROFITS to utility companies. Do they really need mega billions in revenues? What happened to considering the PUBLIC SERVICE?

Subject: Docket No. 20220001-EI

Docket No. 20220001-EI I am a customer of Duke Energy Florida. I understand that the Florida Public Service Commission (FPSC) is considering a request by Duke Energy Florida to increase its rate for 2023 due to "volatile" fluctuations of natural gas prices. Duke's electricity rate per KWH is currently 29% higher than FP&L (see below) and Duke is now asking for another 15% for 2023, the highest increase of the three monopoly power companies seeking a rate increase. Duke already charges more per KWH than the other two, large investor-owned electric utility companies in Florida (source: Sept. 2022 issue of Florida Trend Magazine): Duke Energy - \$201.32/1,500 KWH FP&L - \$156.81/1,500 KWH Tampa Electric - \$175.17/1,500 KWH Non-investor owned near me: OUC - \$169.25/1,500 KWH Kissimmee - \$173.59/1,500 KWH The FPSC Commissioners need to be asking, "How can Duke Energy justify asking for even more money from their captive customers when they already charge the highest rate compared to all the other major electricity utilities in Florida?" Rather, the Commissioners should tell this public monopoly utility to look harder for cost savings and new efficiencies, and reduce their profit margin rather than asking for even more money from their captive customers. I strongly urge the FPSC Commissioners to reject this rate increase request.

Sincerely,

Richard F. Ranieri

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to reject these proposals and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases at this time.

How many rate increases are you going to approve? When is enough enough? When will you stand up for your own mission of setting fair rates?

Subject: Docket No. 20220001-EI

I am a customer of Duke Energy Florida. I understand that the Florida Public Service Commission (FPSC) is considering a request by Duke Energy Florida to increase its rate for 2023 due to "volatile" fluctuations of natural gas prices.

Duke's electricity rate per KWH is currently 29% higher than FP&L (see below) and Duke is now asking for another 15% for 2023, the highest increase of the three monopoly power companies seeking a rate increase. Duke already charges more per KWH than the other two, large investor-owned electric utility companies in Florida (source: Sept. 2022 issue of Florida Trend Magazine):

Duke Energy - \$201.32/1,500 KWH
FP&L - \$156.81/1,500 KWH
Tampa Electric – \$175.17/1,500 KWH

Non-investor owned near me:
OUC - \$169.25/1,500 KWH
Kissimmee - \$173.59/1,500 KWH

The FPSC Commissioners need to be asking, "How can Duke Energy justify asking for even more money from their captive customers when they already charge the highest rate compared to all the other major electricity utilities in Florida?" Rather, the Commissioners should tell this public monopoly utility to look harder for cost savings and new efficiencies and reduce their profit margin rather than asking for even more money from their captive customers.

I strongly urge the FPSC Commissioners to reject this rate increase request.

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.

I am a customer of Duke Energy Florida. I understand that the Florida Public Service Commission (FPSC) is considering a request by Duke Energy Florida to increase its rate for 2023 due to "volatile" fluctuations of natural gas prices. Duke's electricity rate per KWH is currently 29% higher than FP&L (see below) and Duke is now asking for another 15% for 2023, the highest increase of the three monopoly power companies seeking a rate increase. Duke already charges more per KWH than the other two, large investor-owned electric utility companies in Florida (source: Sept. 2022 issue of Florida Trend Magazine): Duke Energy - \$201.32/1,500 KWH FP&L - \$156.81/1,500 KWH Tampa Electric - \$175.17/1,500 KWH Non-investor owned near me: OUC - \$169.25/1,500 KWH Kissimmee - \$173.59/1,500 KWH The FPSC Commissioners need to be asking, "How can Duke Energy justify asking for even more money from their captive customers when they already charge the highest rate compared to all the other major electricity utilities in Florida?" Rather, the Commissioners should tell this public monopoly utility to look harder for cost savings and new efficiencies, and reduce their profit margin rather than asking for even more money from their captive customers. **I strongly urge the FPSC Commissioners to reject this rate increase request!!!!!!** Melissa LaNinfa

Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to reject these proposals and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases at this time.

How many rate increases are you going to approve? When is enough enough? When will you stand up for your own mission of setting fair rates?.....

"I am on a fixed income and I have my air conditioner set on 78 degrees all the time. My bill the same time last year was \$103.13 and this year it was \$139.66. The kWh were 143 more than last year. I repeat I am on a fixed income and try to use as little electricity as possible but I do live in an electric home and my appliances and air conditioning are 3 years of age.... Please with all the other increases in food and gas and other utilities and increases in property taxes please do not increase this year..... We are eating less and I have lost 50 lbs since this inflation has begun. I am hungry..... Please refrain from these increases..... please.... I wish things were like they were before....but due to poor government decisions the people on fixed retirement incomes are the ones suffering the most. Please do not raise the rates.... not now....

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.

Commissioner Mike LaRosa,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills. FPL already raised my rate by a whopping \$20 per month on balance billing, and I'm a senior on a low fixed income. I can't afford any more rate hikes!

This past year has been extremely challenging financially for many people in the state of Florida, including me and my wife. We are living on a single source of social security. It is already difficult trying to decide where we can save a few dollars to prevent utilities from being turned off. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time.
