The Company's final true-up amount for 2021, Actual/Estimated True-Up amount for 2022, and proposed 2023 NGCCR Factors are consistent with the Commission's methodology for calculating the net true-up and recovery factors for the natural gas conservation programs and, therefore, should be approved. FCG submits that the proposed 2023 NGCCR Factors are appropriate for application to customers' bills beginning the first billing cycle in January 2023 through the last billing cycle in December 2023 and continuing until modified by subsequent order of the Commission.

4. <u>STATEMENT OF ISSUES AND POSITIONS</u>

FCG's statement of issues and positions in this proceeding are as follows:

Florida City Gas: The total net true-up (inclusive of the final true-up for 2021, the Actual/Estimated True-Up for 2022, and interest) to be collected from January 2023 through December 2023 is an under-recovery of \$404,512. *See* FCG Exhibit MB-2, Schedule C-3, page 4, line 12. (*FCG witness Bustos*)

ISSUE 4: What are the total conservation cost recovery amounts, net of the true-up amount, to be collected during the period January 2023 through December 2023?

Florida City Gas: Applying the total net true-up results in a total of \$7,012,004 of energy conservation program costs to be collected during the period January 2023 through December 2023. See FCG Exhibit MB-2, Schedule C-1. (FCG witness Bustos)

The Commission should direct staff to verify that the revised tariffs are consistent with the Commission's decision. The Commission should grant Staff authority to administratively approve revised tariffs reflecting the new conservation cost recovery factors determined to be appropriate in this proceeding. (FCG witness Bustos)
