Subject: Docket No. 20220001-EI: Reject the new electric rate hikes!

Florida Public Service Commission Clerk,

Docket No. 20220001-EI

I am a divorced single mother of 2 to which one in college. We could loose our home if you charge more. My bill last month was \$263, in July \$505, in August \$426. We can not make a living here in Pace, FI to sustain ourselves with the bills we have now. Plus One works full time and goes to college the other child I have just has been in the Navy for a year. I also work and do not want my children paying my bills either because they have to live.

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.
