Comments:

every time you give FPL a rate increase, I have to lower my thermostat by 2 degrees, just so I can afford to buy food. I live on a fixed income, as do a lot of people in north west florida. since FPL make millions in profit every year, I don't understand why you keep giving them even more money and making citizens suffer. I know the cost of natural gas BUT

my gas bill has not gone up very much and I use my gas stove to heat the 2 rooms I basically live in now. FPL keeps saying the cost has doubled but I'm not seeing it in my bill. this is what happens to your body when you have to live in a cold home ; <https://www.bbc.com/news/health-63602501>  
my thermostat is set at 60 degrees but if FPL gets another increase to will go to 58 degrees. I have rescue animals that are outside and on the nights when I have to provide them with heat lamps, I can not use the heater inside. they stay warm, I stay cold. that's how it is now. so, thanks to YOU giving FPL rate increase after rate increase, people are freezing in their own homes. we all have to learn to adjust, so why can't FPL adjust to a smaller profit and keep citizens from choosing to either freezing or using heat and starving????
