Subject: Recent FPL bid to increase rates

All Considered,

Recently an email went out to the constituents of Florida that FPL has proposed a 10% increase on our monthly bills. This request to increase the bills has been submitted to your commission.

As a concerned customer and resident of Florida I had to write you all and ask that in your consideration you reject the request to increase our bills by 10%. The residents of Florida are already hurting from the 2022 and current hyper inflation. Right now is not the time to hurt the people of Florida more than they already are hurting. Please understand we are having issues affording groceries right now, we are not getting paid any more money either. Living in the USA in general is becoming extremely difficult.

I lived in a country that had extremely high energy prices, Republic of Moldova. The people there do not live life because they cannot afford anything other than apartment and energy cost; they just wait to die.

Please deny FPLs request to raise our rates

Respectfully,

Matthew Saiani
