Subject: Electric Rates

To Whom It May Concern,

I really hope that this will actually be looked at as energy rates are becoming ridiculous.

Also, as a solar customer, I don't feel it is right that everyone encourages people to go solar and then those of us with solar panels get penalized with a mandatory monthly fee if our usage of electricity falls under that amount for the month.

I really hope you think about reviewing the rates for all customers, as well as the mandatory fee in place for solar customers.

Best Regards,
