Dear Commissioner Fay:

I am writing to suggest that the PSC and Florida utility companies do more to reduce greenhouse gas emissions, in order to combat climate change. The rising sea level and worsening storm intensity make me very concerned for my two nephews in Cocoa Beach and Fort Lauderdale.

Judging from your bio on the PSC website, you do not seem like the typical DeSantis appointee to a commission as significant as the PSC. The Governor seems to have distaste for DEI, which features strongly in your background. Maybe you also do not share the Governor's expressed animus for climate change action, or even acknowledgement. Being on the NARUC committee on infrastructure would make you especially sensitive to the vulnerability of the generating facilities close to our coastline, I would expect.

The dependence of our electrical generation infrastructure on fossil fuel sources will only compound the problems of rising ocean temperatures, sea level, and hurricane severity. Unfortunately, the governing boards of Florida Power & Light and Duke Energy do not seem to be particularly motivated to change their reliance on fossil fuels.

I have seen e-mail messages from Duke to promote their solar energy program (as long as we are willing to buy into their monopoly/franchise control of industrial-scale solar farms). In my personal experience, it is much more efficient to have the solar panels on my rooftop, where I also charge my all-electric Nissan Leaf. In my estimation, the PSC could be doing a lot more to encourage/require the utility companies to turn away from fossil fuels, and promote clean energy in all its forms, including rooftop solar.

I also note that Governor DeSantis has turned down at least two federal programs (from the IRA) that would have provided funding for green energy upgrades by local governments, and energy-efficient appliances by consumers. And also his veto of a bill to promote the state government vehicle fleet to be upgraded to EV's, is a mistake costly to state taxpayers (and bowing to ethanol producers in Iowa?). Governor DeSantis is clearly taking us in the wrong direction.

I would ask that the PSC compensate for the Governor's wrong-headed actions, at the expense of Florida taxpayers. My nephews are counting on it.

Thanks for listening!

**Subject:** Revoke FPL's charter

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Chairman Fay,

I'm writing to urge you to begin an immediate investigation into Florida Power and Light in order to determine whether its charter to operate in the state of Florida should be revoked.

As you are surely aware, FPL CEO Eric Silagy stepped down suddenly after highly credible allegations of campaign finance violations, media manipulation, and the surveillance of critical journalists:

<https://www.npr.org/2023/01/25/1151453870/fpl-florida-power-ceo-eric-silagy>

To call this behavior un-democratic would be a massive understatement. FPL, it seems clear, is more than willing to violate the public trust, game the political system, and do anything and everything to increase its profits - all on the dime of ratepayers who have no choice but to pay them for their power.

A company so blatantly working against the public interest can no longer be allowed to do business in Florida.

Please take swift and sweeping action to investigate FPL and determine whether it is necessary to revoke their charter, as clearly seems to be the case.

Sincerely,

Samantha Pellegrino
