Power bill- The average price per kWh in largo Florida- pinellas county is 13.cents
We are senior citizens being charged as much as \$116 per KWH. Our bills are over \$1000 a month and we just can't afford it. We're on Social Security and Duke Energy refuses to help us we're in a 1900 ft.² with just two people. PLEASE HELP US.

RE: FPSC Inquiry 1432801C

Dear Ms. Parsch::

The Governor's office forwarded a copy of your emails regarding Duke Energy Florida (DEF) to the Florida Public Service Commission (FPSC). The FPSC regulates investor-owned electric, and natural gas utilities throughout the state, and investor-owned water and wastewater utilities in those counties which have opted to transfer jurisdiction to the FPSC. The FPSC has authority in the telephone industry which is limited to the Lifeline Assistance Program, Florida Relay Service, and pay telephone service. We appreciate the opportunity to respond directly to you.

You expressed a concern about DEF's rates. On March 7, 2023, the FPSC approved a mid-course correction to the fuel factors and granted preliminary interim storm restoration charge for DEF.

The adjusted fuel factors reflect unrecovered fuel costs incurred in 2022. The interim storm restoration recovery charges are costs associated with named storms and will replenish each utility's storm reserve fund. Interim storm restoration charges are approved for a 12-month recovery period and are subject to refund, with interest, pending further review once the total actual costs are known for each utility.

Utilities do not earn a profit on fuel charges. The fuel and capacity cost component of customers' bills is set for each calendar year, but mid-course corrections are used when a utility's costs increase or decrease significantly in the interim. Under Commission rules, a utility must notify the PSC when it expects an under- or over-recovery greater than 10 percent.

DEF's approved charges include the new fuel factor to be recovered over 21 months and the preliminary approval for recovery of \$442.1 million in interim storm restoration costs for Hurricanes Elsa, Eta, Ian, Isaias, and Nicole, and Tropical Storm Fred.

We appreciate you sharing your views and will add your correspondence to both Dockets 20230001 and 20230020 regarding the mid-course correction and the storm restoration recovery, respectively.

The next fuel cost hearing will be held on November 1st, 2nd and 3rd. During the hearing, Duke Energy Florida and the other three electric companies regulated by the Florida Public Service Commission will present their projected 2024 fuel and purchased power costs, true-up previous estimates for 2023 incurred costs, and true-up 2022 costs to actual costs. Recovery of capacity, conservation, and environmental costs will also be considered. The Office of Public Counsel will represent the interest of consumers. You may watch the hearings live or afterwards by using the following link:
