**Subject:** Docket # 20230122

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

Florida citizens depend on you to study and manage cost expenditures and savings in holding our public service providers accountable concerning cost effectiveness , planning for the future, and the transparent use of cost saving measures .

Tampa Electric (TECO) has raised residential rates by 62% in the last four years. TECO's petition (Docket #20230122-E1) to file ONLY a 4CP and MDS cost of service study with their anticipated 2024 rate case is just another attempt to raise rates in a way that is extremely favorable to large industrial users and unfavorable to residential customers. Residential customers need protection from these never-ending rate hikes.

As citizens are encouraged to install solar power in order to decrease their use of electricity, the connection between our expense and how the transactions actually increase the power baseline and lower our costs remains as clear as mud. We seek smart planning and tangible results , not smoke and mirrors and dead ends. We need, as citizens, to be able to affect our energy use and expenses.

The recent rate hikes have hit the families I know , extremely hard, and are difficult to accept. Yet another request for a rate hike without full review is unacceptable.

Please require TECO to file a more balanced cost of service study (12CP and 1/13th AD) and ensure that Florida families are protected in the process.

Sincerely,

Lora Karas  
818 W. Alfred Street  
Tampa FL, 33603-5406

We need your help to stop the endless electricity rate hikes in Florida.

Tampa Electric (TECO) has raised residential rates by 62% in the last four years. TECO's petition (Docket #20230122-E1) to file ONLY a 4CP and MDS cost of service study with their anticipated 2024 rate case is just another attempt to raise rates in a way that is extremely favorable to large industrial users and unfavorable to residential customers. Residential customers need protection from these never-ending rate hikes.

Please require TECO to file a more balanced cost of service study (12CP and 1/13th AD) and ensure that Florida families are protected in the process.

Sincerely,

Katharine Chamberlin  
2025 11th st n  
St Pete FL, 33704-4141

Dear Florida Public Service Commissioners,

Floridians need help with the rising cost of living; the cost of electricity is among one of those expenses.

With the onset of winter, and the rising cost of electricity, many homeowners and renters are now being forced to use alternative sources of electricity for light and heat. Unfortunately, many times these sources include lanterns and candles which have been the cause of fires and the loss of life.

Please deny the rate hike for Tampa Electric. Allow the customers of TECO protection against these never ending rising rates.

Sincerely,

Julia L. O'Connell  
150 Whisper Ridge Dr.  
St. Augustine, FL 32092

Please require TECO to file a more balanced cost of service study (12CP and 1/13th AD) and ensure that Florida families are protected in the process.

Sincerely,

Julia O'Connell
