Subject: Tell the FPSC to support clean energy!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Andrew Giles Fay,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,
Mrs. Donna Janke

Dear Commissioner Andrew Giles Fay,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I am elderly with near poverty income but used a big chunk of my tiny savings to install solar (with no rebate I might add because one needed to have a tax liability to get a rebate, but my income is too low for that). Now, FPL charges me \$35 plus taxes if I use NO POWER in a given month! What! Before I installed solar, it was common for my winter month bill to be only \$48 (without solar). NOW, they are charging \$35 just because I have solar and used no power that month. I was common in the winter months BEFORE I installed solar for my bill to be only \$48 with my frugal usage.\$35 plus taxes! I am so enraged. It's steeling from an old financially struggling person!

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Dear Commissioner Andrew Giles Fay,

As a Florida solar using resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to remove the insurance requirement for these home solar installations, there is no risk with inverters that automatically shut down when the grid is gone. The Linemen are already using proper equipment and treat all lines a energized. The insurance requirement is an un-necessary burden and another profit source for the utilities

I urge you to take action to support fair net metering electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Limit any "connection fees" to further enhance profits, we are already connected.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Dear Commissioner Andrew Giles Fay,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,
Mr. Homer Brown
300 Park Ave Satellite Beach, FL 32937-3019 homerbrown1@outlook.com

Subject: Tell the FPSC to support clean energy!

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Commissioner Andrew Giles Fay,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,
Mr. James Teas

Oddly enough, FPL used to have competitive rates. But as Floridians got solar panels, FPL established a minimum monthly bill, then tripled it, and is now pushing it higher. Clearly, this doesn't happen without PSC approval, which is no doubt backed by the legislature, which gets campaign money from...FPL. And the fact that FPL can pick pockets like this means they don't have to compete, and they have no motivation to modernize and innovate. The red state of Florida is working hard against capitalism. Pretty interesting acrobatics.

Sincerely,
Dr. Alfred Jonas

Dear Commissioner Andrew Giles Fay,

As a Florida resident, I am concerned about the high electricity rates charged by big utility companies in our state. These companies rely too heavily on imported fossil fuels and unfairly block the expansion of low-cost, clean solar power to protect their profits.

I urge you to take action to support fair electricity rates for rooftop and community solar programs. Solar energy reduces costs and provides savings that all Floridians should be able to access.

Big Utilities like FPL and Duke Energy must be held accountable. Hard-working Florida families should not have to foot the bill for multi-million dollar executive salaries. I ask you to pave the way for an equitable transition to 100% clean energy in our state.

Solar panels on roofs across Florida provide energy right where it's used. Community solar allows even renters and apartment dwellers to access affordable clean energy. With responsible leadership, we can ensure an energy future that is good for all Floridians.

I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.

Sincerely,
Mr. David Kalb
2808 Attwater Loop Winter Haven, FL 33884-5255 dk22@cornell.edu

It is unconscionable that we should pay for executives' salaries and that the energy companies should lie to us, the taxpayers and utility customers, in order to pad their own bank accounts. We need accountability and executives and others in decisionary roles who have moral centers. I hope I can count on the Florida PSC to do the right thing. Please support fair rates for rooftop solar, community solar programs, and the growth of renewable energy in Florida.
