Re: Notice of a Ownership Change of INdigital, Inc dba INdigital with No Transfer of Certificate or Customer Base - Company Code TY127

To Whom it May Concern:

INdigital, Inc dba INdigital "INdigital" holds authorization in Florida as a Competitive Local Exchange Carrier with Certificate #8889. INdigital submits this Notice of a Change in Ownership from our original ownership to a non-utility entity.

Currently, INdigital is a privately-owned Indiana corporation providing Next Generation 911 (NG911) services and NG911 related services. INdigital's current Officers are Mark Grady, CEO, Jeff Humbarger, CFO, and Eric Hartman, Vice President/COO. The majority ownership and control is being acquired by INdigital Holdings, Inc. a Delaware corporation, who is not a utility or certificated telecommunications provider and will not be seeking certification.

There will be no transfer or relinquishment of our existing Certificate as INdigital will continue to exist and operate under this new ownership structure. INdigital's current management, including its above-listed Officers, will remain Officers following the closing of the transaction, which is expected to close in second quarter of 2024.

The transaction is customer-transparent, with no changes to our name, address, contact information, designated agent nor any changes in services, rates, terms or conditions, etc. as a result. No customers will be transferred as INdigital will remain the operating company.

Sincerely,

/s/ Mark Grady

Mark Grady, Chief Operating Officer
