Comments:

The proposed rate hikes by TECO energy are irresponsible and should not be allowed. They are abusing their customer base who have no other options for electricity and gas. Protect consumers from these irresponsible rate hikes please!

Please don't allow Teco's proposed rate increases over the next several years to be approved at current offering. Many families are struggling with inflation and utility cost in the state of Florida have risen drastically over the last 5 years.

Please do not approve TECO's rate hikes. They are building an expensive new office in an expensive part of town. I can barely afford things now. They can handle tightening their belt. I cannot.

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commissioners,

We need your help to stop the endless electricity rate hikes in Florida.

Tampa Electric (TECO) has raised residential rates by 62% in the last four years. TECO's petition (Docket #20230122-E1) to file ONLY a 4CP and MDS cost of service study with their anticipated 2024 rate case is just another attempt to raise rates in a way that is extremely favorable to large industrial users and unfavorable to residential customers. Residential customers need protection from these never-ending rate hikes.

Please require TECO to file a more balanced cost of service study (12CP and 1/13th AD) and ensure that Florida families are protected in the process.

Sincerely,

Ashley Sainte
