Subject: Docket #20240032-SU

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Commissioners,

My name is David A Stubbs II. I am a full time resident of Don Pedro Island, owner of 352 S. Gulf Blvd., Placida, FL, 33946.

I am respectfully requesting that the PSC deny EU's application for wastewater service.

To review the laundry list of reasons for this request of denial would simply repeat all of the reasons which have been tabled to date. However, for me personally, the EU has not proven the need for such service. Our current

structure is adequate and proven. I have not seen any evidence of failure like the millions of gallons of waste deposited from failure I have personally witnessed on the mainland through out the years.

The system proposed has numerous design flaws within it. As I discussed at the last commission meeting when the EU was making their previous request, unfortunately, many of our homeowners and guests don't even know how to operate a DVR player let alone a high-pressure system like is being proposed.

There will be failures, delays, complications and become a negative impact ecosystem our little island.

Lastly, I'm not interested in connecting, ever... and will do everything in my power not to connect as this idea completely goes against basic common sense let alone basic science... two things I value with extremely high regard.

**Respectfully,
David A Stubbs II**
