To Whom it May Concern:

My husband and I are owners of a condo(I-9) in the Hideaway Bay community on Little Gasparilla Island. It has come to our attention that a private utility company is asking for permission to install sewers on this island at a tremendous cost to all who live there.

As owners in the Hideaway Bay community, we have a licensed, properly maintained waste plant on our property. As a community, we designate thousands of dollars each year to maintain this facility and meet all the state and local requirements. The residents of this community have not asked for or need a sewer system that will require our perfectly good system to be shut down and to be required to hook up to the new system which as I understand it will cost a minimum of \$20,000 per unit owner in addition to the monthly fees.

It should be noted that Charlotte county is not pushing sewer systems on any of the barrier islands and that the company that is applying for this approval is a private, for-profit organization (EU). If a poll was taken of LGI residents, based on my understanding of information provided at the last Hideaway Bay HOA meeting, there would be few if any who are in favor of this project.

As concerned island property owners, my husband and I ask that you not approve this project. We did not ask for a new private sewer system nor do we need a system in Hideaway Bay. We appreciate your consideration. We also ask for a confirmation of receipt of this email.

Regards,
