I am a St Petersburg FL resident, 62 years old, on a fixed income and I'm incredibly concerned about yet another increase in service along with other costs; rent, food, utilities, insurance, etc.

With the increasing new luxury apartment buildings under construction and opening, this means more customers for Duke and Spectrum, etc., how do they find it even reasonable for the increase in our bills!?

Summers are getting increasingly hotter which makes our usage even greater, and there are many who can't afford their bills now, so why join the greed in our Country and burden the customer even more, as if we're getting more services or better electricity, making it unaffordable for so many??

Please deny this increase as more customers are and will be flooding into our City and the Tampa Bay area, which will increase their revenue as it is!
Deeply concerned!

To whom this may concern,

Please do not allow Duke Energy to raise their rates any more for a while. We are barely keeping up with the recent increase. I implore to reject their proposal.

Thank you for your time,

Sandy Bigler
Citizen of Florida

To whom it may concern,
Im writing this email to let those who are in charge of making sure Florida residents are not taken advantage of by our utilities companies. Its bad enough the Governor allows insurance companies to rake is over the coals ..
Enough is Enough !!!

Please stand up for Florida residents as you are one as well and it will eventually affect all of us .
No more increases !! People are suffering enough with all the greed allowed by our elected officials.

Sincerely ,

Donald M Eisenman

Comments:

"Do not approve Duke Energy's request for a \$820 million increase. Do not allow them to raise rates by 27% over the next three years, this is a \$16.48 per month increase in 2025 alone. Do not allow them to Increase their guaranteed profit (return on equity) to 11.5% which is well well above the national average of 9.71%. They have done nothing to deserve it. If they can find a way to cut our rates then let them have more profit. Do not all them to add \$2.56 more to the \$30 per month fixed customer charge, which is unrelated to electric usage. Again, they do nothing to warrant this. I believe their rates are already the highest in the state. They have the lowest customer approval rating as well. This rate hike will burden households already struggling and suffering with rising costs. They owe us for the power station they never built and the crystal river plant they screwed up. Tell them NO!"
