CORRESPONDENCE 5/29/2024 DOCUMENT NO. 04347-2024

Charlie Smith

From: Office of Chairman La Rosa

Sent: Wednesday, May 29, 2024 1:12 PM **To:** Commissioner Correspondence

Subject: FW: In Rust We Trust

Good afternoon,

Please place the email below in CORRESPONDENCE - Consumers & Representatives in docket 20240000.

Thank you.

Subject: In Rust We Trust

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear commissioner LaRosa,

I'm a mother who fears for my family in a warming world.

Economists say that if the price of grid storage drops to \$20/kWh, fossil fuels will not be competitive with renewables. That is now on the verge of happening with a battery based on rust!

https://linkprotect.cudasvc.com/url?a=https%3a%2f%2fsingularityhub.com%2f2023%2f01%2f11%2fform-energys-new-factory-will-churn-out-iron-air-batteries-for-grid-scale-

storage%2f&c=E,1,13ArywM_lOpsPsXs7QfNWZroVPKT29JkKk9KbQq4FRxCldERa1PyzqlKUdkir9UajAmcjBgy2J4mrwFZFK6bxhl3U_PvjZLonT399RyjvEyZP5h4yKZ79AP6zWw,&typo=1

Form Energy's iron-air battery offers low cost (\$20/kWh), long duration (100-150 hours), safety (non-flammable), and recyclability. All of these are key advantages over lithium-ion batteries for grid-scale energy storage. It can store energy for 100 hrs. However, it has lower efficiency (50% vs. 95%), slower charging, and larger size/weight than lithium batteries.

Although rust batteries are less efficient (50% vs. 95%), that doesn't matter in places like California and Texas, where there is a surplus of renewable energy. And as solar and wind get cheaper, there will be more and more states in this situation.

The upshot? New fossil fuel infrastructure is a bad investment - not just for ecologically, but financially. No new fossil fuel infrastructure, period!

Sincerely,

Corinne Woodland
