Hello,

I am filing a complaint in reference to my electric bill. Increasing the rate on our electric utility is going to the extreme. I am disabled and barely living as it is. I live on a check on a month to month basis from disability. Rent, water and now electricity.....This is beyond belief. Everyone in the state of Florida is going to become homeless in the next 2 years if someone doesn't take the time and look at humanity. People are dying out in this world. And imagine what our electric bill is going to look like this summer. If it's already reaching 97 degrees, imagine when the summer does get here. 🙄🙄

Thanks,
Barbara

Teco is applying for another rate increase and I can't understand why you would even consider their request. My bill was up over 50% for the past 3 years for the same kwh. On April 18, 2023 I got an e-mail from Teco they filed for a request from you to decrease the rates by about 11% for residential customers. This was because of the new solar plants they were constructing. They do their best to convince their customers that solar is the way to go to lower utility cost, and yet rates keep go up, and all you hear is that it's some other company increasing their cost. Every body and every business whats to pass the blame on to someone else. THIS NEEDS TO STOP!!

sincerely:

Mark Beasey
