Subject: Duke energy price hike

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

We are totally against this increase by Duke energy. With the inflation going on prices are out of control and people are going under. Many people are having to charge their everyday needs to credit cards which will take them forever, if ever to pay back. As Floridians we cannot sustain any more price increases. So many of us are on very limited incomes and already having to cut out medications and so forth because of prices. Please stop this increase from Duke energy.

Christopher and Tricia DeRussy

Your increase being presented in absurd. Your looking at increasing profits over consumer affordability

Please do not raise your rates. Seniors on fixed incomes deserve better after paying you for most of their adult lives a part of their monthly income. We need you to understand how much this will affect what we will be able to spend on food and medicine.

To whom it may concern;

I am opposed to the proposed rate hike request from Duke Energy Company. They have a monopoly on Pinellas County the customers have taken on fees for them doing business in the county which are fees Duke Energy should be paying. In fact the consumers should be reimbursed for all the added fees that has been imposed on us. I just received a usage email from Duke Energy which says energy usage cost is approximately \$74.71 and when the bill comes it's going to be approximately \$154.00. Please advise why there's an up charge of approximately \$80.00. This is above and beyond excessive. Enough is enough return the money back to the consumers.

With all due respect
Penda Devine.
