1. Have the state and federal regulations on emissions of greenhouse gases been considered in the process of developing the utility's numeric conservation goals filed in Docket No. 20240018-EG? Please explain your response).
 - A. No. Peoples developed its DSM goals based on its current Commission-approved DSM programs and in conformance with the Commission's *Cost Effectiveness Manual for Natural Gas Utility Demand Side Management Programs*. Peoples is committed to increasing energy efficiency for natural gas equipment through its DSM programs and achieving its DSM goals, both of which contribute to reductions in greenhouse gas emissions. However, Peoples is not aware of a methodology for including greenhouse gas emissions in developing its DSM goals.
