Subject: RE: Docket number 20240025: I urge to stop Duke Energy's rate increases and to retire harmful coal plants

Good Afternoon, Andrea Green,

We will be placing your comments below in consumer correspondence in Docket 20240025-EI and forwarding them to the Office of Consumer Assistance and Outreach.

Sincerely,

Hong Wang

Office of Commission Clerk
Florida Public Service Commission
2540 Shumard Oak Blvd.
Tallahassee, FL 32399-0850

Subject: Docket number 20240025: I urge to stop Duke Energy's rate increases and to retire harmful coal plants

CAUTION: This email originated from outside your organization. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Dear Florida Public Service Commission,

Protect our wild spaces or they will be gone for ever.

To the Florida Public Service Commission,

- 1) Duke must prioritize the retirement of outdated and environmentally harmful coal plants, particularly Crystal River Units 4 and 5, to mitigate air and environmental pollution.
- 2) The continued operation of these coal plants poses significant health risks to residents, including respiratory diseases, heart issues, and premature death, highlighting the urgent need for retirement.
- 3) Coal burning contributes to greenhouse gas emissions and exacerbates climate change, threatening Florida's coast and increasing the severity of hurricanes, necessitating a transition to cleaner energy sources.
- 4) Low-income communities, such as those near Crystal River, bear disproportionate health burdens from coal pollution, underscoring the need for equity in environmental decision-making.

5) Transitioning from coal to renewable energy sources not only reduces pollution but also lowers costs for consumers, aligning with both economic and environmental sustainability goals.

The retirement of coal units by 2030 is imperative for the health, environment, and economic well-being of Florida residents, requiring decisive action from Duke Energy.

Thank you for considering my comment.

Sincerely,

Andrea Green
