To whom it may concern,

I'm so sorry that I am needed out of town on the day we were to meet again and I would make the same statements as before which is summarized by, I'm still not sure as to why I'm having to even consider the experience again.

With that said, I want to take the opportunity to again express my disapproval of this proverbial S--T Show. I'm a well known industry leading designer of systems and processes for various manufactures and if I had ever

come up with this harebrained idea, even if I was paid, it would be certain retirement.... Hummers' maybe that's the plan.

There are so many things that I guess i'll never understand on items like this that are imposed on us, without financial support, especially as it relates to the character (in which we cannot mention) as it relates to the perceived quality of the individuals on the other side of this request.

Luckily for me there was a Facebook post this am, that made me smile as I ponder never hooking up to such a dismal plan. I share this post with you below in case you missed it, its worth the paper I printed it on.

A summary from concerned person

1: NO need has been demonstrated.

2: Cost is outrageous: in addition to hookup , we have to give up an easement , destroy our landscaping, provide power( larger panel and generator)

3: No county or government assistance.

4: The proposed technology is no longer being used due by our countries to the high cost of maintenance.

5: the applicant has no direct experience on a project of this magnitude and has a questionable background involving various arrests.

6: Timing could not be worst: Every owner has been saddled with huge direct costs from Helene and Milton.  
TY

7: Speak with any property owner on Lemonbay Lane where they have a low pressure system. They have all experience 2-8k in pump replacements over the past 5 years.

8: the only logical reason this can or is being considered is not being addressed, It will benefit only one person...The Applicant.... Period

I am not saying there is any wrong doing here , but it sure feels like it

Nothing on this issue passes a simple smell test.

Be well,

I'll continue to say no in my absence.
